🎻 INTERESTS

Blockchain Development & Decentralization
Exploring smart contracts, dApps, and how blockchain can change the world.

Smart Home Technology
Building and experimenting with IoT devices to automate everyday life.

Self-Driving Cars & Autonomous Tech
Fascinated by the future of transportation and AI-powered vehicles.

Tech Innovation & Problem Solving
I am always curious about new tech trends and solving challenges with creative solutions

Creative Digital Projects
Enjoy working on graphics, video editing, and DIY tech projects to sharpen skills.

Federal University of Technology, Akure. ↗

2023 – present | Akure, Nigeria

Currently pursuing a degree in Information Technology with a focus on blockchain development, smart contracts, and decentralized applications. Passionate about building real-world tech solutions and actively involved in web3 communities and hackathons to gain hands-on experience.

📁 PROJECTS

Meme Vibe ↗

A mini app on faracster.

04/2025 – 05/2025

Developed a decentralized mini application that allows users to easily create, share, and mint memes on Farcaster. Integrated a meme battle feature to drive user engagement and added NFT minting functionality for onchain ownership.

Role: Developer

Technologies: Farcaster mini-app framework, JavaScript, Node.js, Solidity, NFT.storage ↗ , Pinata

🗂 CERTIFICATES

certificate of participation ↗

Johnkollyns Mathematics Challenge

Blockchain basics ↗

Cyfrin Updraft certification

🏠 ORGANISATIONS

WEB3 Nova ↗

Student intern

2025 – present | Akure, Nigeria

Web3 Nova is a community and learning hub focused on empowering African developers in blockchain and web3 technologies. As a member, I actively participate in workshops and collaborative projects, enhancing my practical skills in smart contract development, frontend tools, and web3 integration.

💼 PROFESSIONAL EXPERIENCE

Base Batches ↗

Participant/Developer

04/2025 – 05/2025 | Akure, Nigeria

Built a decentralized mini app on Farcaster that enables users to create, share, and mint memes seamlessly. Introduced a meme battle feature to boost engagement and integrated NFT minting to provide users with on-chain ownership of their content.

Role: Developer

Technologies: Farcaster Mini-App Framework, JavaScript, Node.js, Solidity, NFT.storage ↗ , Pinata
